

SimpleButton Facility Management Maintenance AWS IoT Dash Button

Facility Management Made Easy

- Lower Facility Maintenance Costs
- Communicate with a network of 65,000+ facility
- Reduce Administrative Costs
- Increase Customer Loyalty

SimpleButton Control Tower Monitors requests, sends notifications, and manages communication between systems.

Lower Facility Management Maintenance Costs by 15%

Simplifying the request process with a click of a button, reduces phone time, follow up time, and reduces time away from customers.

Hassle Free, Push Button Improve Response Time

Easy facility requests keep store and facility team members at their post without pulling them away from customers and missed sales. Improved Response time **increases sales by 11%**.

Increase Customer Loyalty

Customers view facility maintenance requests in real time along with graphical history of when, who, and where requests are made.

Guarantee loyal customers for life and separate from the competition. *Improve customer retention by 13%.*

Reduce Back Office Costs

Reduce administrative costs with push button automation that simplifies the maintenance request process while communicating with vendors, maintenance companies, and contractors in a single click.

“SimpleButton upped our bottom line. We have improved store sales on by 16%!”
